REVELE

REPORTING AND ANALYTICS

Turn insights into action.

Data is the fuel to power your practice. At Revele, we offer a suite of reporting, analytics, and dashboard solutions developed to help eClinicalWorks drive performance improvements.

Custom Reports

Get custom eClinicalWorks reports when you need them for half the price of what other eCW firms charge.

Custom Dashboards

Let us help you pull together various reports into a custom dashboard that give you a glimpse into overall RCM performance.

Comparative Analytics

Compare your practice data to your peer's data and determine where to improve across clinical and financial data.

Enterprise Analytics

Monitor clinical, operational, and financial analytics by setting custom goals that alert you when KPIs are off track.

Custom Reports & Dashboards

DENIAL ANALYSIS

Get a detailed view of denials to analyze the root cause and areas for improvement.

CLAIM LEVEL FINANCIAL ANALYSIS

See charges, payments, adjustments and more at the claim level.

CPT FINANCIAL ANALYSIS

The CPT Financial Analysis report includes modifiers and place of service data.

CLAIM LEVEL PAYMENTS

The Payments at the Claim Level report provides detailed information on payments posted.

PATIENT LIST

Get detailed patient demographic information for collections, patient satisfaction surveys, etc.

WRITEOFF ADJUSTMENT

The writeoff adjustment report provides detailed information to assist with reviewing write-offs and adjustments.

Don't see what you're looking for?

Contact us to request the custom report you need and we'll build it.

Analyze large amounts of healthcare data - **faster**

"The ad hoc tool is fantastic! It takes me a matter of minutes to respond to report requests and since the site administrators now have their own secure access to their specific practices, I don't get as many unique report requests."

Director of Revenue Cycle
(Large Academic MS Practice with over 450 Physicians)

"We're moving to a performance based compensation model and I need a way to distribute productivity reports to all the providers on a timely basis without having to create them manually. In addition, I need to track what's happening this month, not last month."

Chief Financial Officer
(20 provider FQHC)

KNOWLEDGE IS POWER

See how a plug and play enterprise analytics solution makes analyzing large amounts of financial, operational, and clinical data fast and easy.

Whether you're looking for ways to set and achieve revenue performance targets or improve provider productivity and profitability, Revele's Enterprise Analytics package can help.
